Leading Edge
TRIAC Dimmer
HDI -MD0403 432

Parameters

Parameters		
Electrical Parameters:		
Working power	DC15~30V	
Power consumption	28mA/DC24V	
Output channel	4CH/3A	
Maximum output channel current in total	10A	
Fuse	8A	
TRIAC	25A TRIAC, Minimum Load 40w	
Dimming curves	Linear, 1.5 exponent, 2.0 exponent, 3.0 exponent	
Environmental Conditions:		
Working temperature	-5°C~45°C	
Working relative humidity	Up to 90%	
Storage temperature	-20°C~+60°C	
Storage relative humidity	Up to 93%	
Approved		
CE		
RoHS		

RoHS		
Product Information:		
Dimensions	144×90×66 (mm)	
Net weight	715(g)	
Housing material	Nylon, PC	
Installation	35mm DIN rail installation	
Protection rating	IP20	
Power cable	AC in: 2.5mm ² ~4mm ²	
rowel cable	Load:1.5mm² ~2.5mm²	
Installation Position	Distribution Box (DB)	

Installation Steps

- 35mm DIN rail Installation, inside DB Box
- Mark up each output connection cable
- Connect the load and HDL Buspro
- Check if there is any short circuit in output connection cable
- Check the HDL Buspro connection, avoid any mistake
- Isolate the high voltage and low voltage cable

HDL Buspro Cable Guide

CAT5/CAT5E	HDL Buspro	HDL Buspro/KNX
Brown/Orange	DC24V	Red
Brown white/Orange white	COM	Black
Blue white/Green white	DATA-	White
Blue/Green	DATA+	Yellow

Overview

HDL-MD0403.432 4-channel 3A Dimmer , supports AC240V and AC110V power input. It has 4 output channels, each channel has a bypass button for manual control. There is fuse protection for each channel, the Dimmer will be protected in case of short circuit. LED indicator will show you which channel has short circuit

Functions

- Up to 4 separate areas; max 12 scenes for each area
- Up to 6 sequences and each sequence has 12 steps
- 4 Dimming curves, the dimming accuracy is 512 step
- Low, high, max threshold for each channel
- Bypass button for manual control available for each channel
- It is optional setting of choosing a designated scene or back to previous scene when power on again after power off
- Short circuit and over heat protection
- Max 3A of each channel, 8A fuse of each channel for protection (aR type)
- Supports HDL Buspro Pro online upgrading

Important Notes

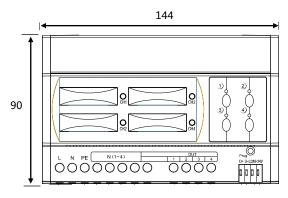

- Buspro cable HDL Buspro/KNX cable, 0.8mm singlecore copper cable
- BUSPRO Connection Series connection (hand-in-hand)
- AC power Make sure input AC voltage match with setting in dimmer module
- Connect checking Check all connection after installation
- Output Channel Current of each channel can not exceed the prescribed current
- Fuse The fuse to replace the broken one must be of the same type(aR type)
- Load type Incandescent light, halogen, LED Light, etc
- The load must be suitable for leading edge dimming
- Make sure the working temperature of the Dimmer does not exceed 50 °C

Side view

Indicator for module

Indicator: Flickers when the module is working properly. Keep pressing the indicator for 3 seconds, it turns to red, then user can read and modify the address of the module in the HDL Buspro Pro set up software.

Safety Precautions

- Fuse must be aR type, and current of each channel can not exceed the prescribed current
- Turn off the power of Dimmer when replace Fuse
- (PE) should be connected
- Make sure the working temperature of the Dimmer does not exceed 50 °C
- Current in each channel should not exceed 3A
- The screw down strength should not exceed 0.4Nm
- Do not make wrong connection on Buspro interface, it will damage the Buspro interface of this module
- Never let liquids get into the module. It will damage this device
- Do not get AC voltage into Buspro wire , it will damage all devices in the system
- Ensure good ventilation
- Avoid contact with liquids and aggressive gases
